Software Developer Wanted for Study

Dear students of computer sciences,

For my thesis, I plan to conduct a scientific study in cooperation with the Institute of Computer Science of the University of Bonn, to which I would like to cordially invite you. With your participation you would help me a lot. As expense allowance for the participation you receive

€100.

Previous knowledge: Java

Details:

We are looking for motivated students of computer sciences who would like to participate in a scientific study on web development in Java. The goal is to test the usability of various Java APIs for web development. In the study you will be asked to implement parts of a web application and to participate in a subsequent survey. Previous knowledge in Java is necessary. The study is expected to take 5-6 hours to complete. You can divide your time freely. With the study, we do not want to test you or your knowledge, but rather examine the usability of the APIs. Anonymised data are expected to be published in a scientific paper. Your consent will be asked again.

The confidentiality of our participants' data is very important to us. All data collected in the study will be treated anonymously. The study is conducted independently of the college you are enrolled and no personal data will be exchanged with the college or third parties. At no time, neither in the study nor in a scientific publication, there will be a connection drawn to the company or institution of the participant.

As expense allowance for the participation in the study you get **100 Euro.**

Interested?

Then please fill in the following questionnaire:

https://www.surveymonkey.de/r/F32YCNQ

Thank You!

The expression of interest does not guarantee participation. The study will be conducted in cooperation with the working group of Prof. Dr. med. Matthew Smith of the Computer Science Faculty of the Rheinische Friedrich-Wilhelms-Universität Bonn. The expense allowance will be compensated by the University of Bonn and is independently of your company.
